Diophantine inheritance for p-adic measures

SHREYASI DATTA AND ANISH GHOSH

Abstract. In this paper we prove complete p-adic analogues of Kleinbock's theorems [18, 19] on the inheritance of Diophantine exponents for affine subspaces. In particular, we answer in the affirmative (and in a stronger form) a conjecture of Kleinbock and Tomanov [22], as well as a question of Kleinbock [19].
